On 19/02/2025 · 19:50

Ângela Ribeiro

Considered this profile **a bot**.

On 20/02/2025 · 11:02

Reason(s):

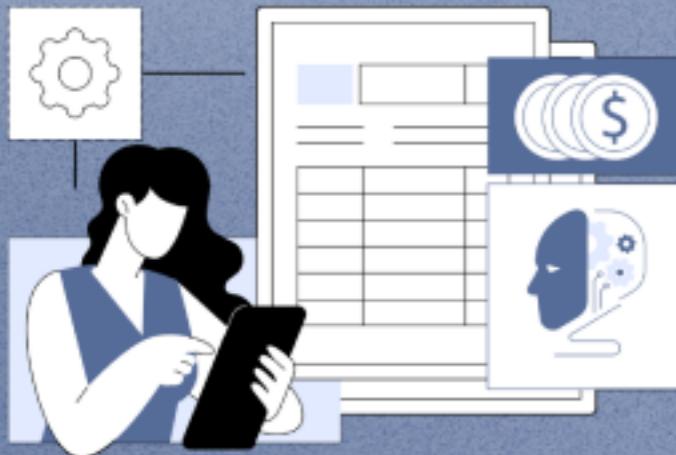

- AI-generated images
- Inconsistent posting
- Unnatural posting patterns

How can you tell if an account is run by AI?

Consistency

AI-generated content often has a consistent tone and style, sometimes lacking human-like variability.

Quality and Uniqueness

AI-generated content might lack unique insights or personal touches, relying more on generic phrases.

Low follower to following ratio

Bots tend to follow many more accounts than those who follow them.

Unnatural posting patterns

Look for unusually fast response times and highly consistent engagement across different time zones.

Lack of engagement

Accounts run by bots often have little to no engagement from other users, or no reactions to the posts.
